

Author Index

- Ballantine, C. S.
(Triangularizing matrices by congruence), 261
- Bellman, R.
(Some inequalities for the square root of a positive definite matrix), 321
- Bender, E. A.
(Classes of matrices and quadratic fields), 195
- Brenner, J. L.
(Applications of the Dieudonné determinant), 511
- Brualdi, R. A., and Wielandt, H. W.
(A spectral characterization of stochastic matrices), 65
- Bückner, H. F.
(A minimal property of the Jordan canonical form), 503
- Butts, H. S., and Estes, D.
(Modules and binary quadratic forms over integral domains), 153
- Carlson, D.
(A new criterion for H -stability of complex matrices), 59
- Ciarlet, P. G.
(Some results in the theory of non-negative matrices), 139
- Cottle, R. W., and Dantzig, G. B.
(Complementary pivot theory of mathematical programming), 103
- Dantzig, G. B., see Cottle, R. W., 103
- Erdelsky, P. J.
(A general theorem on dominant-diagonal matrices), 203
- Estes, D., see Butts, H. S., 153
- Fan, K.
(An inequality for subadditive functions on a distributive lattice, with applications to determinantal inequalities), 33
- Fox, L., and Hayes, Linda
(Polynomial factorization and the Q - D algorithm), 445
- Gaines, F.
(Kato-Taussky-Wielandt commutator relations), 127
- Hadeler, K. P.
(Ein inverses Eigenwertproblem), 83
- Hayes, Linda, see Fox, L., 445
- Haynsworth, E. V.
(Determination of the inertia of a partitioned Hermitian matrix), 73
- Haynsworth, E. V., and Ostrowski, A. M.
(On the inertia of some classes of partitioned matrices), 299
- Henrici, P., and Zimmermann, Katharina
(An estimate for the norms of certain cyclic Jacobi operators), 489
- Hestenes, M. R.
(Pairs of quadratic forms), 397
- Lancaster, P., and Webber, P. N.
(Jordan chains for lambda matrices), 563
- Läuchli, P.
(Algebraic reduction of electrical multi-terminal networks), 537
- Marcus, M., and Minc, H.
(Extensions of classical matrix inequalities), 421
- Marcus, M., and Pierce, S.
(Extensions of the Minkowski inequality), 13
- McEntegert, P., see Thompson, R. C., 211

- Mendelsohn, N. S.
(An application of matrix theory to a problem in universal algebra), 471
- Minc, H., see Marcus, M., 421
- Newman, M.
(An identity of A. Ostrowski), 317
- Ostrowski, A. M., see Haynsworth, E. V., 299
- Pearl, M. H.
(Generalized inverses of matrices with entries taken from an arbitrary field), 571
- Pierce, S., see Marcus, M., 13
- Pták, V.
(Spectral radius, norms of iterates, and the critical exponent), 245
- Rado, R.
(An extension of Sylvester's law of inertia), 29
- Rainey, J. W.
(The tridiagonal forms of real, non-derogatory matrices), 465
- Rutishauser, H.
(Once again: the least square problem), 479
- Schwerdtfeger, H.
(Remarks on the generalized inverse of a matrix), 325
- Seidel, J. J.
(Strongly regular graphs with $(-1, 1, 0)$ adjacency matrix having eigenvalue 3), 281
- Taussky, Olga
(Automorphs and generalized automorphs of quadratic forms treated as characteristic value relations), 349
- Taussky, Olga
(The factorization of the adjugate of a finite matrix), 39
- Thompson, R. C.
(On the matrices AB and BA), 43
- Thompson, R. C., and McEnteggert, P.
(Principal submatrices II: the upper and lower quadratic inequalities), 211
- Varga, R. S.
(Nonnegatively posed problems and completely monotonic functions), 329
- Veinott, Jr., A. F.
(Extreme points of Leontief substitution systems), 181
- Webber, P. N., see Lancaster, P., 563
- Wielandt, H. W., see Brualdi, R. A., 65
- Wilkinson, J. H.
(Almost diagonal matrices with multiple or close eigenvalues), 1
- Wilkinson, J. H.
(Global convergence of tridiagonal QR algorithm with origin shifts), 409
- Wynn, P.
(Vector continued fractions), 357
- Zimmermann, Katharina, see Henrici, P., 489
