

AUTHOR INDEX VOLUME 31 (1984)

Cohn, P.M., Puiseux's theorem revisited	1 - 4
Dieudonné, J., Emmy Noether and algebraic topology	5 - 6
Faith, C., The structure of valuation rings	7 - 27
Formanek, E., Rational function fields. Noether's problem and related questions	28 - 36
Golan, J.S., Minimal injective resolutions and Bass invariants of modules over left stable left Noetherian rings	37 - 46
Grzeszczuk, P. and E. Puczyłowski, On Goldie and dual Goldie dimensions	47 - 54
Harada, M., Serial rings and direct decompositions	55 - 61
Jespers, E. and P. Wauters, What is an Ω -Krull ring?	63 - 73
Jøndrup, S., Fixed point rings of finite automorphism groups of hereditary finitely generated P.I. algebras	75 - 81
Kharchenko, V.K., Noncommutative invariants of finite groups and Noetherian varieties	83 - 90
Le Bruyn, L., Class groups of maximal orders over Krull domains	91 - 107
Marubayashi, H., Remarks on VHC-orders in a simple Artinian ring	109 - 118
Meijer, A.R. and P.F. Smith, The complement of Gabriel topologies	119 - 137
Montgomery, S. and D.S. Passman, Galois theory of prime rings	139 - 184
Montgomery, S. and L.W. Small, Integrality and prime ideals in fixed rings of P.I. rings	185 - 190
Passman, D.S., <i>see</i> Montgomery, S.	139 - 184
Puczyłowski, E., <i>see</i> Grzeszczuk, P.	47 - 54
Puystjens, R., Moore-Penrose inverses for matrices over some Noetherian rings	191 - 198
Raynaud, J., Profondeur, hauteur et localisations en algèbre non commutative	199 - 215
Small, L.W., <i>see</i> Montgomery, S.	185 - 190
Smith, P.F., <i>see</i> Meijer, A.R.	119 - 137
Stafford, J.T. and R.B. Warfield, Hereditary orders with infinitely many idempotent ideals	217 - 225
Van Den Bergh, M. and J. Van Geel, A duality theorem for orders in central simple algebras over function fields	227 - 239
Van Geel, J., <i>see</i> Van Den Bergh, M.	227 - 239
Van Oystaeyen, F., Some constructions of rings	241 - 251
Verschoren, A., The closed socle of a relative Azumaya algebra	253 - 262
Warfield, R.B., <i>see</i> Stafford, J.T.	217 - 225
Wauters, P., <i>see</i> Jespers, E.	63 - 73
